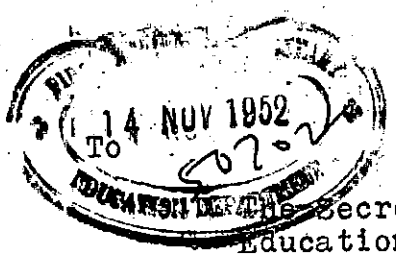
Date 12th November 1952.



To The Secretary to Government,
Education Department,
Fort St. George, M a d r a s .

Sir,

Sub:- Veerasaiva College- Bellary-Construction of Buildings.
Ref:- No.A.5084 dated 8-11-52 from the Registrar of the University of Madras.

*****

I am glad to inform you that the Syndicate of the Madras University was pleased to grant time till 31-3-1953 for the construction of Veerasaiva College Building.

Please permit me to inform that the time now granted is barely sufficient. I have made it quite clear as the completion of the Building, in my application for affiliation to the University dated 24th October 1952, a copy of which was sent for your kind information.

I have been repeatedly informing you how, in spite of our best intentions, we could not complete the buildings within the specified time, due to reasons mainly connected with the paucity of materials, chiefly iron and steel, which even the good offices of the Controller of Commodities, Madras, could not procure for us. I am happy to state that this month at last we have been able to secure at a cost of over Rs.15,000/- iron and steel necessary for completing at least the ground floor of the building. With these on hand, the work of construction is being speeded up with a view to occupying the ground floor of new building by July 1953 itself.

Work on the Natural Science Block, the plan of which has been approved by the University (Vide- Registrar's communication No.2536 dated 23-5-1952 to the Principal of the College) has also started, and we expect this block also to be ready for occupation by next July.

Even the materials we have secured now for completing the ground floor have been secured only with the greatest difficulty, and those required for the completion of the first floor are not easily available anywhere at present. Certainly they are not available in Madras. They are, therefore, being ordered for directly from the Manufacturers themselves - Messrs. Tata Iron

P.T.O.

Iron and Steel Works Ltd., Jamshedpur. As soon as the work on the ground floor is over by about June next, the work on the first floor will be commenced, and this will be completed in about 4 to 5 months after that, thus enabling us to occupy the entire new buildings by November 1953.

Since all the three laboratories of the College, with their Lecture Halls and other appurtenances are on the ground floor itself, and since the accommodation provided by this ground floor for exceeds the entire accommodation provided by the present temporary buildings of the College, it is now proposed to shift the College to the ground floor of the new building in July next.

Thus, it could be kindly seen that the construction of the ground floor of the New Building will be completed by July 1953 affordoing location of the College in the new building from the next accedemic year and finish the roofing and other work of the first floor by November 1953. The progress of construction and completion of building work by July 1953 will permit us to locate the College in the New Building as stated in my application for affiliation to the University mentioned above.

In the circumstances stated above, I would be very grateful if the Government would move the University to grant extention of time, till July 1953 as was done so kindly by Government in

I remain, Sir,
Yours faithfully,

PRESIDENT,
The Madras Veerasaiva Vidyavardhaka Sangha,

REGISTERED

BELLARY
Date 25th November. 1952.

The Vice Chancellor,

University of Madras,

Madras.

Sir,

Sub:- Continuation of Affiliation - Veerasaiva College, Bellary, - requested.

Ref:- My application dated 24th October 1952.

WP Fee

As stated in my application dated 24-10-1952 for the continuation of affiliation of this College, I have the honour to send herewith the details of the proposals made therein.

1. G E N E R A L.

1. The Proposals as finalised stand as follows:-

(i) Introduction of the Natural Science Group in the Courses of Studies in our College.

(ii) An all round increase in strength, as given below, in all the subjects from July 1953 onwards, on account of the shifting of the College to its new buildings.

		Present Strength in each of the two Inter Classes.	Proposed strength.
Part I, ENGLISH. ..		160.	350.
Part II, KANNADA. TELUGU, URDU.		160.	350.
Part III,	(a) MATHS, PHYS, CHEMS.	72.	104.
	(b) PHYS, CHEMS, NAT. SCI. ..		96.
	(c) MOD. HIS, IND. HIS, LOGIC.	28.	30.
	(d) MOD. HIS, IND. HIS, COMM.	60.	120.

2. It is further requested that while the total strength in Part II may be fixed at 350, variations should be permitted (within this maximum) in the numbers to be admitted for each of the three individual subjects in that group.

3. Similarly, it is requested that the maximum for the Science Group together -- Part III, (a) and (b) above - while being fixed at 200, variations should be permitted in the numbers to be admitted in these two individual groups, the strength of the Natural Science Group, however, not having to exceed 96.

4. In the same manner, the maximum for the two History Groups together in Part III, -- (c) and (d) above -- may be kindly fixed at 150, the strength of the Commerce section of it, however, not having to exceed 120.

2. A C C O M O D A T I O N.

Although the College will be occupying only the Ground Floor of the new building in July next, the accomodation on this floor is sufficient for these increased numbers. When the First Floor over the front part of the building is completed in November 1953, we shall have still greater accomodation for these numbers in the building.

A copy of the plan of the building is already in the Registrar's office. Enclosure 1 is a rough plan of the Ground Floor of the building showing the allotment of rooms for the various subjects in July 1953. Enclosure 2 is a similar plan showing the allotment of rooms to the various subjects when the building is completed.

3. TIME - TABLE.

For 1953-54 this given as Enclosure 3. During this year we shall have the Natural Science Group and the increased strength only in the Junior class. Enclosure 4 gives the Time Table for 1954-1955 and onwards, when both the classes will be working with full strength.

Both these Time Tables show also the rooms allotted to the various subjects, Enclosure 3 showing these on the Ground Floor only, and Enclosure 4 showing these on both the Ground Floor and the First Floor.

4. DIVISION INTO SECTIONS.

On account of the proposed increase in numbers it has been found necessary to have the following sections for the various subjects in 1953-54.

ENGLISH.	3 Sections.
KANNADA.	2 "
PHYSICS.	2 "
CHEMISTRY.	2 "
HISTORY.	2 "
& COMMERCE.	2 "

At present, excepting, for English, which has 2 sections, all the other subjects have only one section each.

5. S T A F F S

1. In order to cope with the increased work due to the formation of these Sections, it is proposed to appoint the following additional staff:—

(i) A Lecturer in English.
(ii) A Lecturer in Physics.
(iii) A Lecturer in Chemistry.
(iv) A Lecturer in Natural Science.
(v) A Lecturer in History. (temporary for 1953-54 only)
(vi) An Asst. Lecturer in Kannada (in lieu of the present Tutor in Kann
vii) A Tutor in English.
iii) A Tutor in Commerce.
(ix) A Demonstrator in Physics.
(x) A Demonstrator in Chemistry.
(xi) A Librarian.

The following also will be appointed for the year:—

(i) A Gas Man.
(ii) Three Attenders - One for each of the Three Science Subjects.
(iii) A wholetime Sweeper for the three Laboratories only.
(iv) Necessary Menail Staff.

FOR 1954-1955.

In addition to the above ——

(i) A Lecturer in Commerce.
(ii) A Demonstrator in Natural Science.
(iii) An Assistant Physical Director.

2. Since, however, a Lecturer in Commerce will be appointed for 1954-55, the Tutor's post in Commerce created in 1953-54 will be abolished. Similarly, since History in both the classes will have only one section each from 1954-55 onwards, the temporary History Lecturer's post created in 1953-54 will also be abolished.

6. N A T U R A L S C I E N C E.

1. The Natural Science Department proposed to be newly started in the College from 1953-54 will be housed in a self-contained block, 109' x 24', in the new buildings. This consists of, as can be seen from Enclosure 5, a Lecture Hall 40' x 24', a Museum and Store Room, 19' x 24', a Staff Room 10' x 24', and a Laboratory 40' x 24', for the use of 24 students working at a time.

2. It is proposed to admit 96 students in this subject in each of the two Inter classes, Practical Work being carried on in 4 batches of 24 students each.

3. The Staff, as mentioned above, will consist of only a Lecturer for this year. An Attender and a Sweeper, the latter of whom will be common to the three Laboratories, will also be appointed. A Demonstrator will be appointed in 1954-55.

4. The Lecture Hall (40' x 24') 'D' in Enclosure 1 easily accomodates about 100 students, and, with a Gallery, 120 students. In addition to the usual furniture, this Hall will have a Demonstration Table, to which gas and water connections will be given.

5. The Laboratory (40' x 24') Enclosure 6 provides accomodation for 12 work-tables for 24 students working at a time. The dimensions of these tables are 6' x 3' x 2½' (Ht), and 2 students will work at each table. Each student will be provided with the necessary dissection apparatus, microscope, etc., Gas and water connections will be given to the Laboratory at required points.

6. The Museum and Store Room, (19' x 24') provides sufficient accomodation for the purpose.

7. The Staff Room, (10' x 24') provides adequate accomodation for a Lecturer and a Demonstator.

8. Equipment. The list of the Laboratory Equipment, Students' apparatus, Museum specimens, Charts, Models, etc., that will be obtained for this Department is given separately as Enclosure 7.

9. Library Books. A list of these also, which will be obtained for the Department, is appended as Enclosure 8.

10. An Animal Room. -- This will be separately constructed outside the Natural Science Laboratory and near to it.

7. C H E M I S T R Y.

1. This department has (1) A Lecture Hall, 30' x 30', (2) a Store Room, 10½' x 30'., (3) A Lab. 30' x 30'., (4) A Balance Room, 10' x 30' and (5) a Preparation Room 8' x 20'. After the completion of the First Floor of the new building in November 1953, this Department, along with the Physics one, will take possession of the room 20' x 30' marked 'G' in Enclosure 1, to be used, with suitable partitions, as a Staff Room for Physics and Chemistry, and for housing the Physics and Chemistry Section Libraries.

2. It is proposed to admit 200 students in this subject in each of the two Intermediate Classes. The Lecture work will be carried on in two sections and the Practical Work in 4 batches of 50 each.

3. The Staff will consist of (1) two Lecturers and (2) two Demonstrators. Two Attenders, a Gas man and a whole-time Sweeper (the last common to the three laboratories) will also be appointed.

4. The Lecture Hall (30'ax 30') Room 'E' in Enclosure 1 easily accomodates about 100 students, and, with a Gallery which will be put up, will accomodate many more. Besides the usual furniture, it will have a Demonstration Table (Enclosure 9) fitted with gas and water connections. The Lecture Hall will have all the other appurtenances also necessary for Intermediate Chemistry Lecturers.

5. The Laboratory (50' x 30'), ~~Enclosure 10~~ - has been designed for 50 students to work at a time. It will contain 10 work tables, five of dimensions 11½' x 4½' x 3'(Ht) -- (Enclosure 11) and five of dimensions 7½' x 4½' x 3' (Ht) -- (Enclosure 12) Each of the five larger tables provides working space for 6 students, three on each side, and each of the five smaller tables for 4 students, two on each side. Work-table space is thus provided for 50 students. All the work-tables are provided with bench reagent shelves and with the requisite numbers of lockers for keeping the students' individualsets of appratus. (See Enclosure 11 and 12).

~~The Laboratory will have sufficient number of~~

The Laboratory will have a sufficient number of wall reagent shelves, fume cupboards, general purposes tables, blow pipe tables, hot air and steam ovens, draining racks, sinks etc., .. All these are indicated in the plan of the laboratory supplied. (Enclosure 10)

6. The Balance Room (10' x 30'). This adjoins the Lab, which has two doors leading on to it -- one for entrance and the other for exit. This room can easily accomodate 25 balances. It is well lighted with as many as 4 large windows etc., each 5' x 2'.

7. Students' Apparatus. --- Each student will be given an individual set of apparatus for his use throughout the year. The list of this apparatus is given as Enclosure 13.

8. Gas Supply. -- It is proposed to have a Kerosene oil gas plant with a Gas Holder of 1,000 C.C. capacity to start with. The various appurtenances of this gas plant such as the Gas-Producer, the Gas Retorts, the Air Mixer etc., will be housed in a separate shed, built according to standard specifications, at a reasonable distance from the laboratories. This plant will supply gas to all the three laboratories.

9. Water Supply -- A Water Tank (already possessed by the College) of 400 gallons capacity will be erected near the College Well, which seems to have a perennial supply of good water. This College already possess a Copper Still for distilled water.

10. Preparation Room.--- A room 8' x 20' to the southern side of the laboratory will be fitted with two work benches, bench reagent shelves, wall reagent shelves etc., to serve as a Preparation Room. It will also serve temporarily as a Chemistry Staff room and will house the Chemistry section Library.

8. P H Y S I C S.

1. This Department has (1) a Lecture Hall 30' x 30', (2) A Lab. 60' x 30', and (3) a Store Room, 10' x 30'. (see Enclosure 1). As mentioned under Chemistry, this Department will share with Chemistry the room marked '10' in Enclosure 1), as a Staff and Library Room, with suitable partitions, when the construction of the First Floor of the building is completed.

2. As in Chemistry also, it is proposed to admit 200 students in this subject in each of the two Intermediate Classes. The Lecturework will be carried on in 2 sections and the Practical work in 4 batches of 50 each.

3. The Staff will consist of (1) two Lecturers and two Demonstrators. There will also be two Attenders for the Department.

4. The Lecture Hall (30' x 50'), will be fitted with a gallery giving easy accomodation to about 115 students, and a Demonstration Table fitted with gas and water and electric connections. Besides the usual furniture, the Hall will be provided with all the appurtenances necessary for an Intermediate Physics Lecture Hall.

5. The Laboratory. (60' x 30') -- Enclosure 14 has been designed for 60 students working at a time, but only 50 students will be admitted for a batch. This will contain 6 work benches, each of dimensions 20' x 4' x 3' (Ht). Each of these will be fitted with horizonatal benne carrying hooks etc., and also with gas connection at required points. There will also be a platform (12' x 6') in the laboratory with a Demonstration Table on it. Sufficient room has been set apart also in the Laboratory for placing the required numb r of balances. There is provision for water connections and sinks also.

9. L A N G U A G E S.

1. ENGLISH. --- The strength of each class in English will be 350. It will be worked in 3 sections, and will be manned by 3 lecturers and 3 Tutors. The normal hours of work, namely 28 ? per week, are allotted to each section.

2. KANNADA. --- It is proposed to take about 200 students in this subject in each of the two Inter Classes. This means that each class will be working in 2 sections. In 1953-54, since there will be the increased strength only in the Junior Class, it is proposed to abolish the present Tutor's post and convert it into an Asst. Lecturer's post. In 1954-55, however, the Asst. Lecturer's post will be converted into a Lecturer's one, taking care to appoint for it a person qualified to do Translation work also.

3. TELUGU.--- It is proposed to admit 100 to 120 students, and there will be only one Section in this Subject.

4. URDU. --- No change in the present arrangement is necessary.

5. The various rooms in which these Languages classes (both Senior and Junior) will be held during 1953-54 and from 1954-55 onwards are indicated in the two Time Tables Enclosed (Enclosure 3 and 4), the key to the allotted rooms being given in Enclosure 1 and 2.

10. THE HISTORY GROUPS.

1. The History Groups at present consist of (1) Modern History, Indian History and Logic and (2) Modern History, Indian History and Elements of Commerce and Accountancy. The total strength proposed for both these groups together is 150, the maximum for the Commerce Group being kept at 120. Since there will be no large Hall in the building to accomodate 150 students at a time during 1953-54, and since the Commerce classes have to be held in two sections, it is proposed to split the class in these two groups into 3 sections, called History 1, and History 2. and History 3. in the following manner:---

History 1, to consist of only Logic Students.
History 2, to consist of only the first 60 Commerce students.
History 3, to consist of the remaining Commerce students, not more than 60.

2. In effect, it is found that along with the Commerce Classes, each History class also has to be split up into two sections, necessitating thereby the appointment of an additional Lecturer in History for the year 1953-54. And this will be done. The Time-Table for 1953-54 (Enclosure 3) makes clear this division of the History classes into 2 sections maximum each, and of both the History groups together into 3 sections as mentioned in para 1 above.

3. From 1954-55 onwards, however, a big Lecture Hall, 50' x 24', which can easily accomodate 150 students at a time will be made available for the History classes, and so their division into two sections is found unnecessary. So, from 1954-55, the History classes will have only one section each. This is made clear in the Time-table for 1954-55, Enclosure 4.

4. The Commerce classes, as has already mentioned above, will be split into 2 sections from 1953-54 onwards. During 1953-54, however, both the sections of the Junior Inter, as also the one section in the Senior Inter, will be handled by only one Lecturer since he will have this year lecturing work for not more than 12 hours a week, the maximum prescribed by the University. But it is proposed that he should be assisted by a Tutor during 1953-54.

5. From 1954-55 onwards, it is proposed to have two Lecturers for Commerce, one for each section, and the services of the Tutor in Commerce will then be dispensed with.

6. The rooms in which the various History, Commerce and Logic classes will be held during 1953-54, and during 1954-55 and onwards are indicated in the Time Tables appended Enclosure 3 and 4 (See Enclosure 1 and 2 also.)

11 PHYSICAL EDUCATION.

1. Pending the construction of a Sports Pavilion for the College, it is proposed to extend the Gas Shed and construct a room to serve as the office room of the Physical Director and also as a store Room for Sports materials. This will be in 1954-55. During 1953-54 the room 16' x 24' marked 'b' in Enclosure 1 will be used by the Physical Director as his office and also for keeping the Sports materials.

2. In 1954-55 an Assistant Physical Director will be appointed since the number of students from this year onwards will exceed 500.

12. PRINCIPAL'S ROOM, COLLEGE OFFICE, etc., etc.,

1. The rooms allotted for various other purposes for 1953-54 and for 1954-55 and onwards are shown in the Enclosures 1 and 2 respectively. They are:—

ROOMS.	DIMENSIONS. for 1953-54.	for 1954-55
1. PRINCIPAL'S ROOM.	20' x 24'.	15'x 24'. (First Floor.)
2. COLLEGE OFFICE.	Combined with the above.	15' x 24' (First Floor.)
3. STUDENTS' READING ROOM.	20' x 24'.	24' x 24'.
4. STAFF ROOM.	24' x 24'.	20' x 30' (Two Rooms.)
5. WOMEN STUDENTS' ROOM.	20' x 24'.	20' x 24'. (First Floor.)
6. STUDENTS' CO-OPERATIVE STORES.	16' x 24'.	16' x 24'.

In conclusion, I have only to say any other information that may be required regarding these proposals will be gladly supplied.

Yours faithfully,

President,
THE MADRAS VEERASAIVA VIDYAVARDHAKA SANGHA,

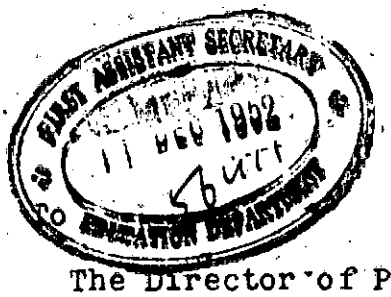
VEERASAIVA COLLEGE BELLARY

Ref No.....



—39

Date 9th December '52.

The Director of Public Instruction,

Nungambaukam, Madras

Sir,

Sub:- COLLEGE - Veerasaiva College, Bellary
Construction of College Building - -
Progress of work - Report Submitted.

Ref:- Director's Proceedings R.C.No.213 D8/51 dated 28th November 1952.

With reference to the above, I have the honour to draw your attention to paras 2, 3, and 4 of my application to the Vice-Chancellor dated 24-10-1952 for the continuation of the affiliation of the College, a copy of which has been submitted to your office on the same day.

As stated therein, the work on the building, the walls of which had come up to the ceiling of the Ground Floor, could not be completed within the specified time due to the paucity of the Iron and Steel beams of the required dimensions, which even the good offices of the Controller of Commodities, Madras, had not been able to procure for us. Since the decontrol of Iron and Steel commodities by Central Government in October last, we have been able to procure, with considerable effort and at a cost of over Rs.15,000/-, the necessary Iron and Steel beams for completing the ceiling of the Ground Floor. This work is progressing apace now, and, as stated in the application referred to above, we shall definitely complete the Ground floor of the building by about first week of July enabling us to shift the college to it in the same month.

The Vice-Chancellor in his communication to me, No.A.5084 dated 8-11-1952, has since been pleased to extend the time for the completion of the building till 31-3-1952. But this is not possible, since the construction (at an estimated cost of over Rs.48,000/-) of the Natural Science Block (70' x 24') which was not in the original plan of the building, and for which an application made for Government Grant has been unfortunately turned down, is also proceeding apace, and will be completed in June next.

Further.

Further, the Iron and Steel beams required for the ceiling of the First Floor of the building are still unavailable to us in the open market. We have addressed to the Tata Iron and Steel Works, Jamshedpur, the main manufacturers themselves, regarding these, and we expect to get these from them in about four or five months' time from now. We have paid an advance of Rs.5,000/- in this direction to the dealers and we intend to get them at any cost.

Thus, as soon as the Ground Floor is completed in June next, enabling us to shift the College to it in July next, work on the first Floor will be commenced and completed by about November 1953. This fact has already been communicated to the Vice-Chancellor, not only in our application to him for the continuation of the affiliation of the College referred to above, but also in a subsequent communication to him giving the detailed schemes for the functioning of the College on the Ground Floor of the new building from July next, and in the entire completed building after November'53. A copy of this latter communication to him has also been submitted to your office on 28-11-1952.

To Summarise therefore----

(i) Work on the ceiling of the Ground Floor and on the Natural Science Block, had not been included in the original plan, is proceeding apace, and the entire Ground Floor with the Natural Science Block will be ready for occupation by the College in July next.

(ii) Work on the First Floor will be commenced soon after, and completed in about four or five months' time, after that. The construction of the entire building is, therefore, expected to be completed by November 1953.

I am sincerely and earnestly hoping that we shall be able to keep up to the above schedule and will not have any need to apply for a further extension of time for the completion of the building.

The copy of the communication ~~for~~ asked for in your Proceedings R.C.No.2143 D8/51 dated 20-11-1952 has already been submitted to your office by the Principal of the College on 27-11-1952.

Yours faithfully,

V. Mahalingappa

EDUCATION DEPARTMENT

From

The Director of Public Instruction,

Madras

To

The Secretary to Government,
Education Department,
Fort St. George, Madras

Rc.No.213.D.8/51 dated 18.12.1952

Sir,

Sub: College - Veerasaiva College Bellary - Construction of College buildings - Request for extension of time till July 1953 - Remarks submitted.

Ref: Government Memo.No.50762.F/52-1 Edn., dated 20.11.1952 and the reminder thereon. Memo.No.50702 F./52-2 Edn., dated 8.12.52.

The Management of the Veerasaiva College, Bellary in their letter to me, No.Nil dated 9.12.1952, a copy of which appears to have been submitted by them to the Government also, report that the work on the ceiling of the ground floor and on the Natural Science Block, which was not in the original plan, is proceeding apace and that the entire ground floor with the Natural Science Block will be ready for occupation by the college in July next. It is reported that the Natural Science Block (70'x24' at an estimated cost of Rs.48,000/-), which was not included in the original plan of the building scheme, is constructed simultaneously. This accounts for the slow progress of the work and the consequent inability of the Management to complete the college buildings by 31-3-1953, the date up to which extension of time has been granted by the University as per letter No.A. 5084 dated 8.11.1952 of the Registrar of the University of Madras.

In the above circumstances and in view of the assurances given by the Management in their letter cited to the effect that the construction of the entire building will be completed by November '53 there may not be any need to apply for a further extensionof time for the completion of the Building. I recommend that the request of the Management for extension of time may be forwarded to the University for their favourable consideration.

Yours faithfully,

for Director of Public Instruction

The University of Madras granted extension of time for the completion of the buildings for the Veerasaiva College, Bellary, till the 31st January 1953. The President of the Madras Veerasaiva Vidyavardhaka Sangha, Bellary, states that the Syndicate of the University has granted further extension of time for the constfuction of the college buildings till 31.3.1953. For the reasons mentioned in the letter on p.p.9-11 c.f. the President of the Sangha requests the Govt. to move the University to grant still further extension of time for the completion of the buildings till July 1953. He has also addressed the University in the matter. A copy of his letter to the University will be found on p.p.5-7 c.f. For orders whether the remarks of the D.P.I. may be called for, before examining the request further. Subject to orders, a draft memo. is submitted for approval.
